In England, and in some of the United States, they acquire a prescriptive right.

Syn. — Old, primitive, pristine, antique, antiquated, old-fashioned; obsolete. — ANCIENT, ANTIQUATED, OBSOLETE, ANTIQUE, ANTIC, OLD. — *Ancient* is opposed to *modern*, and has reference to antiquity, as, an *ancient* family, *ancient* landmarks, *ancient* institutions, systems of thought, etc. *Antiquated* describes that which has gone out of use or fashion, as, *antiquated* furniture, *antiquated* laws, rules, etc. *Obsolete* is commonly used, instead of *antiquated*, in reference to language, customs, etc., as, an *obsolete* word or phrase, an *obsolete* expression. *Antique* is applied, in present usage, either to that which has come down from the ancients, as, an *antique* cameo, bust, etc; or to that which is made to imitate some ancient work of art; as, an *antique* temple. In the days of Shakespeare, *antique* was often used for *ancient*; as, "an *antique* song," "an *antique* Roman," and hence, from the singularity often attached to what is ancient, it was used in the sense of grotesque, as, "an oak whose *antique* root peeps out," and hence came our present word *antic*, denoting grotesque or ridiculous. We usually apply both *ancient* and *old* to things subject to gradual decay. We say, an *old* man, an *ancient* record, but never, the *old* sun, *old* stars, an *old* river or mountain. In general, however, *ancient* is opposed to *modern*, and *old* to *new*, *fresh*, or *recent*. When we speak of a thing that existed formerly, which has ceased to exist, we commonly use *ancient*, as, *ancient* republics, *ancient* heroes, and not *old* republics, *old* heroes. But when the thing which began or existed in former times is still in existence, we use either *ancient* or *old*, as, *ancient* statues or paintings, or *old* statues or paintings, *ancient* authors, or *old* authors, meaning books.

Syn. — Excuse. An *apology*, in the original sense of the word, was a *pleading off* from some charge or imputation, by explaining and defending one's principles or conduct It therefore amounted to a vindication One who now offers an *apology*, admits himself to have been, at least apparently, in the wrong, but brings forward some palliating circumstance, or tenders a frank acknowledgment, by way of reparation. We make an *apology* for some breach of propriety or decorum (like rude expressions, unbecoming conduct, etc.), or some deficiency in what might be reasonably expected. We offer an *excuse* when we have been guilty of some breach or neglect of duty, and we do it by way of extenuating our fault, and with a view to be forgiven. When an *excuse* has been accepted, an *apology* may still, in some cases, be necessary or appropriate. "An *excuse* is not grounded on the claim of innocence, but is rather an appeal for favor resting on some collateral circumstance An *apology* mostly respects the conduct of individuals toward each other as equals, it is a voluntary act produced by feelings of decorum, or a desire for the good opinion of others" *Crabb.*

Syn. — To APPRECIATE, ESTIMATE, ESTEEM *Estimate* is an act of judgment, *esteem* is an act of valuing or prizing, and when applied to individuals, denotes a sentiment of moral approbation See ESTIMATE *Appreciate* lies between the two As compared with *estimate*, it supposes a union of sensibility with judgment, producing a nice and delicate perception As compared with *esteem*, it denotes a valuation of things according to their appropriate and distinctive excellence, and not simply their moral worth Thus, with reference to the former of these (delicate perception), an able writer says, "Women have a truer *appreciation* of character than men," and another remarks, "It is difficult to *appreciate* the true force and distinctive sense of terms which we are every day using" So, also, we speak of the difference between two things, as sometimes hardly *appreciable* With reference to the latter of these senses (that of valuation as the result of a nice perception), we say, "It requires a peculiar cast of character to *appreciate* the poetry of Wordsworth," "He who has no delicacy himself, can not *appreciate* it in others," "The thought of death is salutary, because it leads us to *appreciate* worldly things aright" *Appreciate* is much used in cases where something is in danger of being overlooked or undervalued, as when we speak of *appreciating* the difficulties of a subject, or the risk of an undertaking So Lord Plunket, referring to an "ominous silence" which prevailed among the Irish peasantry, says, "If you knew how to *appreciate* that silence, it is more formidable than the most clamorous opposition" In like manner, a person who asks some favor of another is apt to say, "I trust you will *appreciate* my motives in this request" Here we have the key to a very frequent use of the word. It is hardly necessary to say that *appreciate* looks on the favorable side of things We never speak of *appreciating* a man's faults, but his merits This idea of regarding things favorably appears more fully in the word *appreciative*, as when we speak of an *appreciative* audience, or an *appreciative* review, meaning one that manifests a quick perception and a ready valuation of excellence.

The *broadax,* or carpenter's ax, is an ax for hewing timber, made heavier than the chopping ax, and with a broader and thinner blade and a shorter handle.

This word was originally spelt with *e, axe,* and so also was nearly every corresponding word of one syllable, as, *blaze, bare, ware, mete, mete, pipe, ore, flute,* etc. This superfluous *e* is now dropped; so that, in more than a hundred words ending in *x*, no one thinks of retaining the *e* except in *axe.* Analogy requires its exclusion here.

The various forms, *am, are, is, was, were*, etc, are considered grammatically as parts of the verb "to be," which, with its conjugational forms, is often called the *substantive verb*. √97. Cf. FUTURE, PHYSIC.] **1** To exist actually, or in the world of fact; to have existence.

To *be* contents his natural desire. *Pope.*
To *be*, or not to *be*, that is the question. *Shak.*

2 To exist in a certain manner or relation, — whether as a reality or as a product of thought, to exist as the subject of a certain predicate, that is, as having a certain attribute, or as belonging to a certain sort, or as identical with what is specified, — a word or words for the predicate being annexed, as, to *be* happy, to *be* here, to *be* large, or strong, to *be* an animal, to *be* a hero, to *be* a nonentity, three and two *are* five, annihilation *is* the cessation of existence, that *is* the man.

[In] such a proposition as this, "A centaur *is* a fiction of the poets," it can not possibly be implied that a centaur exists, since the proposition itself expressly asserts that the thing has no real existence. *J. S. Mill.*

3 To include or to involve as a result, consequence, etc, to bring, to effect, to produce, or to cause, as, what *is* that to you?

4 To signify, to represent or symbolize, to answer to.

The field *is* the world. *Matt.* xiii 38.
The seven candlesticks which thou sawest *are* the seven churches. *Rev.* i 20.

☞ The verb *to be* (including the forms *is, was*, etc) is used in forming the passive voice of other verbs; as, John has *been* struck by James. The present and imperfect tenses form, with the infinitive, a particular future tense, which expresses necessity, duty, or purpose, as, government *is* to be supported, we *are* to pay our just debts, the deed *is* to be signed to-morrow.

Have or *had been*, followed by *to*, implies movement. "I *have been* to Paris." *Sydney Smith.* "*Have* you *been* to Franchard?" *R. L. Stevenson.*

☞ *Been*, or *ben*, was anciently the plural of the indicative present. "Ye *ben* light of the world." *Wyclif, Matt.* v 14. Afterwards *be* was used, as in our Bible. "They that *be* with us are more than they that *be* with them." 2 *Kings* vi 16. *Bin* was also the old infinitive. "To *ben* of such power." *R. of Gloucester. Be* is used as a form of the present subjunctive. "But if it *be* a question of words and names." *Acts* xviii 15. But the indicative forms, *is* and *are*, with *y*, are more commonly used.

Be it so, a phrase of supposition, equivalent to *suppose it to be so*, or of permission, signifying *let it be so*. *Shak.* — **If so be**, in case. — **To be from**, to have come from; as, *from* what place *are* you? *I am from* Chicago. — **To let be**, to omit, or leave untouched, to let alone. "*Let be*, therefore, my vengeance to dissuade." *Spenser.*

Syn. — To BE. EXIST. The verb *to be*, except in a few rare cases, like that of Shakespeare's "To *be*, or not to *be*," is used simply as a *copula*, to connect a subject with its predicate, as, man *is* mortal, the soul *is* immortal. The verb *to exist* is never properly used as a mere copula, but points to things that *stand forth*, or have a substantive being, as, when the soul is freed from all corporeal alliance, then it truly *exists*. It is not, therefore, properly synonymous with *to be* when used as a copula, though occasionally made so by some writers for the sake of variety, as in the phrase "there *exists* [*is*] no reason for laying new taxes." We may, indeed, say, "a friendship has long *existed* between them," instead of saying, "there has long *been* a friendship between them," but in this case, *exist* is not a mere copula. It is used in its appropriate sense to mark the friendship as having been long in *existence*.

Be- [AS *be*, and in accented form *bī*, akin to OS. *be* and *bī*, OHG *bi, pi*, and *pī*, MHG. *be* and *bī*, G *be* and *bei*, Goth. *bi*, and perh. Gr *ἀμφί* about (cf. AS. *beséon* to look about). √203. Cf. BY, AMB-.] A prefix, originally the same word as *by;* joined with verbs, it serves: (*a*) To intensify the meaning; as, *bespatter, bestir*. (*b*) To render an intransitive verb transitive, as, *befall* (to fall upon), *bespeak* (to speak for). (*c*) To make the action of a verb particular or definite, as, *beget* (to get as offspring); *beset* (to set around).

It is joined with certain substantives, and a few adjectives, to form verbs, as, *bedew, befriend, benight, besot, belate* (to make late), *belittle* (to make little). It also occurs in certain nouns, adverbs, and prepositions,

often with something of the force of the preposition *by*, *about*; as, *belief* (believe), *behalf*, *bequest* (bequeath), *because*, *before*, *beneath*, *beside*, *between*.

In some words the original force of *be* is obscured or lost; as, in *become*, *begin*, *behave*, *behoove*, *belong*.

Syn. — BENEVOLENT, BENEFICENT Etymologically considered, *benevolent* implies *wishing* well to others, and *beneficent*, *doing* well But by degrees the word *benevolent* has been widened to include not only feelings, but actions; thus, we speak of *benevolent* operations, *benevolent* labors for the public good, *benevolent* societies In like manner, *beneficent* is now often applied to feelings, thus, we speak of the *beneficent* intentions of a donor This extension of the terms enables us to mark nicer shades of meaning Thus, the phrase "*benevolent* labors" turns attention to the *source* of these labors, viz., *benevolent* feeling, while *beneficent* would amply mark them as productive of good So, "*beneficent* intentions" point to the feelings of the donor as bent upon some specific good act, while "*benevolent* intentions" would only denote a general wish and design to do good.
